PROFILE

Gameplay and 3C programmer (C++ / Unreal Engine 5), ArtFX Master's graduate 2026. Shipped a jury-awarded end-of-studies game as 3C programmer and producer, led programming on a game made for the Opéra Orchestre National de Montpellier, and built two C++ engines from scratch. Bilingual French / English, raised in Qatar and the UAE: at ease in international, multicultural teams. Looking for a junior gameplay programmer role where engine knowledge makes gameplay code faster and more robust.

PROJECTS

F*** This Job

School · 3C / Gameplay Programmer & Producer | Jury Prize

End-of-Master's arcade FPS (14-person team), released free on Steam in September 2026 (published by ArtFX). Worked on the player character and 3C systems (character, camera, controls) and production planning. Optimization pass took the game from 20 to 60 FPS.

// Unreal Engine 5 · C++ · Perforce · Zorro

La Vengeance de Metella

School · Lead Programmer

Game developed for the Opéra Orchestre National de Montpellier. Worked on core gameplay systems and the technical direction of the programming team.

// Unreal Engine 5 · C++ · Git

Raytracer → Compute Shaders

Personal · Graphics Programmer

CPU path tracer ported to GPU compute shaders with SIMD and multi-threading: render time cut from ~5 hours to seconds. Research documented in a published technical blog post.

// C++ · HLSL · Compute Shaders · SIMD

Two C++ Game Engines

Personal · Engine Programmer

3D Engine: built in ~2 months, then extended to ship a Descent-inspired game.
Obradex Engine: self-contained engine with ImGui editor and an Obra Dinn-style renderer (limited palette, dithering), with Deus Ex-style gameplay and added parkour mechanics.

// C++ · OpenGL · ImGui

UE5 Enemy AI System

Personal · AI Programmer

Behavior-tree NPC with sight and hearing perception, dynamic patrol routes and adaptive difficulty, tuned to stay challenging without becoming unfair.

// Unreal Engine 5 · C++ · Behavior Trees

Game Jams — Battle Boule Arena · Sharkour

Global Game Jam 2024 & 2026

Two games shipped in 48 hours: a 2–4 player local multiplayer arcade brawler, and a single-player traversal game where platforms appear or vanish depending on the equipped mask.

// Unreal Engine 5 · local multiplayer · rapid prototyping

EXPERIENCE

Seasonal Staff

Summers 2020 – 2025

Bed & Breakfast « Le Clos des Olivettes » — Hérault, FR

Guest reception, housekeeping and kitchen support over six seasons: reliability, teamwork and customer service under peak load.
