## PROFILE

Gameplay programming student in my final year of a Master's degree at ArtFx Montpellier, with hands-on experience shipping games and building low-level systems. Passionate about engine architecture, rendering, and gameplay programming. I want to do what I enjoy and live from it.

## EXPERIENCE

### Internship – Electrical Engineer
2018
**E.D.F**

Visits of electrical substations in operation in Doha, Qatar. Discovery of professional engineering environments and business life.

Electrical Engineering | Management | Communication

### Summer Job
2020 – 2025
**Bed & Breakfast «Le Clos des Olivettes»**

Client greeting and assistance, room cleaning and kitchen help across multiple summer seasons in Hérault, France.

Management | Communication | Customer Service

## PROJECTS

### F This Job
School – Gameplay/3C Programmer & Producer

End-of-masters-degree project. Responsible for the player, optimization and project planning. A fast paced FPS, the goal is to make as much of a mess in the office as possible.

// Unreal Engine 5, C++, Zorro, Perforce

### 3D Engine in C++
Personal – Engine Programmer

In-development C++ 3D engine with an editor, aimed at enabling non-programmers to build shooter, movement, management or narrative games. Architecture, rendering pipeline and tooling designed from scratch.

// C++, WPF

### Raytracer into Compute Shaders
Research – Graphics Programmer

Implemented a raytracer, then ported it to Compute Shaders for real-time performance. Also published a technical blog post detailing the research.

// C++

### UE AI System
Personal – AI Programmer

Make an AI that would feel fun without making the game too difficult or too easy.

// Unreal Engine 5, Behaviour Tree

### La Vengeance de Metella
School – Lead Programmer

Lead programmer on a game developed for the Opéra Orchestre National de Montpellier. Responsible for core gameplay systems and team technical direction.

// Unreal Engine 5, Zorro, Github

### Battle Boule Arena
Global Game Jam 2024

Jam game built in 48 hours during Global Game Jam 2024. It's a multiplayer where you play with your friends and bump your balls together until there's only one left.

// Unreal Engine 5

### VFX
Personal – Graphics

Collections of Shaders, Materials and Effects in Unreal Engine, Unity and Godot.

// Unreal Engine 5, Unity, C#, GLSL/HLSL, Godot

### Conway's Game of Life
Personal – Programmer

Implemented Conway's Game of Life as a programming exercise.

// C++, ImGui
