PROFILE

Gameplay programming student in my final year of a Master's degree at ArtFx Montpellier, with hands-on experience shipping games and building low-level systems. Passionate about engine architecture, rendering, and gameplay programming. I want to do what I enjoy and live from it.

EXPERIENCE

Internship – Electrical Engineer Observer
2018
E.D.F

Visits of electrical substations in operation in Doha, Qatar. Discovery of professional engineering environments and business life.

Electrical Engineering · Management · Communication

Summer Job
2020 – 2025
Bed & Breakfast «Le Clos des Olivettes»

Client greeting and assistance, room cleaning and kitchen help across multiple summer seasons in Hérault, France.

Management · Communication · Customer Service

PROJECTS

F This Job
School – 3C/Gameplay Programmer & Producer

End-of-masters-degree project. Responsible for the player, optimization and project planning. The game is currently in final production.

// Unreal Engine 5, C++, Zorro, Excel

La Vengeance de Metella
School – Lead Programmer

Lead programmer on a game developed for the Opéra Orchestre National de Montpellier. Responsible for core gameplay systems and team technical direction.

// Unreal Engine 5

UE AI System
Personal – AI Programmer

Make an AI that would feel like an actual person without making the game too difficult.

// Unreal Engine 5, Behaviour Tree

3D Engine in C++
Personal – Engine Programmer

A 3D game engine with an editor which would allow anyone to easily create shooters, movement or management games and even narrative driven games. Currently in development.

// C++, WPF

Battle Boule Arena
Global Game Jam 2024

Jam game built in 48 hours during Global Game Jam 2024. It's a multiplayer where you play with your friends and bump your balls together until there's only one left.

// Unreal Engine 5

Raytracer → Compute Shaders
Research – Graphics Programmer

Implemented a raytracer, then ported it to Compute Shaders for real-time performance. Also published a technical blog post on the research.

// C++

VFX
Personal – Graphics

Collections of Shaders, Materials and Effects in Unreal Engine, Unity and Godot.

// Unreal Engine 5, Unity, C#, GLSL/HLSL, Godot

Conway's Game of Life
Personal – Programmer

Implemented Conway's Game of Life as a programming exercise.

// C++, ImGui
