HOBBIES

- Electrical Engineering
- Tabletop RPG - DnD (4E, 5E), Naheulbeuk, Warhammer

PROFILE

Gameplay and 3Cs programmer, with hands-on experience shipping games and building low-level systems. Passionate about engine architecture, rendering, and gameplay programming. I want to do what I enjoy and live from it.

EXPERIENCE

Internship - Electrical Engineer Observer — 2018
E.D.F

Visits of electrical substations in operation in Doha, Qatar. Discovery of professional engineering environments and business life.

Electrical Engineering | Management | Communication

Summer Job — 2020 - 2025
Bed & Breakfast «Le Clos des Olivettes»

Client greeting and assistance, room cleaning and kitchen help across multiple summer seasons in Hérault, France.

Management | Communication | Customer Service

PROJECTS

F This Job — School - Gameplay/3C Programmer & Producer

End-of-masters-degree project. Responsible for the player, optimization and project planning as well as gameplay systems.

// Unreal Engine 5, C++, Zorro, Perforce

3D Engine in C++ — Personal - Engine Programmer

In-development C++ 3D engine with an editor, aimed at enabling non-programmers to build shooter, movement, management or narrative games. Architecture, rendering pipeline and tooling designed from scratch.

// C++, WPF

Raytracer → Compute Shaders — Research - Graphics Programmer

Implemented a raytracer, then ported it to Compute Shaders for real-time performance. Also published a technical blog post detailing the research.

// C++

UE AI System — Personal - AI Programmer

Make an AI that would feel fun without making the game too difficult or too easy.

// Unreal Engine 5, Behaviour Tree

La Vengeance de Metella — School - Lead Programmer

Lead programmer on a game developed for the Opéra Orchestre National de Montpellier. Responsible for core gameplay systems and team technical direction.

// Unreal Engine 5, Zorro, Github

Battle Boule Arena — Global Game Jam 2024

- Miniature painting (Warhammer 40K)
- HackMud (hacking game)
- Currently renovating a car (944)
- Drums
- Taekwondo

Jam game built in 48 hours during Global Game Jam 2024. It's a multiplayer where you play with your friends and bump your balls together until there's only one left.

// Unreal Engine 5

VFX

Personal - Graphics

Collections of Shaders, Materials and Effects in Unreal Engine, Unity and Godot.

// Unreal Engine 5, Unity, C#, GLSL/HLSL, Godot

Conway's Game of Life

Personal - Programmer

Implemented Conway's Game of Life as a programming exercise.

// C++, ImGui
