PROFILE

Gameplay and 3C programmer specialized in Unreal Engine 5 and C++, ArtFX Master's graduate. Experienced in developing engine sub-systems, core gameplay systems, and real-time interactive applications across collaborative cross-disciplinary team projects. Bilingual French/English with strong communication skills and proactive problem-solving attitude.

PROFESSIONAL EXPERIENCE

3C / Gameplay Programmer & Producer - F This Job (ArtFX)

September 2026

- Developed player character and 3C systems (character, camera, controls) in C++ for an arcade FPS released on Steam.
- Executed an optimization pass balancing performance and maintainability, driving frame rate from 20 to 60 FPS.
- Collaborated within a 14-person cross-disciplinary team using Unreal Engine 5 and Perforce, earning the Jury Prize.

Lead Programmer - La Vengeance de Metella (Opéra Orchestre National de Montpellier)

- Provided technical direction for the programming team, maintaining clean, commented, and structured code standards.
- Developed core gameplay systems in C++ using Unreal Engine 5 and Git.
- Communicated project progress to stakeholders and guided technical solutions to deliver on schedule.

Engine Programmer - Two C++ Game Engines (Personal Project)

- Built a 3D engine in C++ and OpenGL from scratch in 2 months, adapting code to ship a Descent-inspired game.
- Developed Obradex Engine featuring a self-contained ImGui editor, Obra Dinn-style renderer, and custom gameplay mechanics.

Graphics Programmer - Raytracer Compute Shaders (Personal Project)

- Ported CPU path tracer to GPU compute shaders with SIMD and multi-threading in C++ and HLSL.
- Reduced render time from 5 hours to seconds and authored technical documentation published as a technical blog post.

AI Programmer - UE5 Enemy AI System (Personal Project)

- Programmed behavior-tree NPC with perception systems and dynamic patrol routes in Unreal Engine 5 and C++.

Seasonal Staff - Bed & Breakfast « Le Clos des Olivettes »

Summers 2020 - 2025

- Handled guest reception, housekeeping, and kitchen support across six seasons.

SKILLS

C++, Python, C, Unreal Engine 5, HLSL, GLSL, UE Blueprints, VEX, Unity, Godot, OpenGL, ImGui, Visual Studio, Rider, Perforce, Git, Houdini, Gameplay & 3C, NPC AI, Engine architecture, Rendering, Shaders Optimization
